

QUALITY MANAGEMENT

“Education is the only treasure that increases as much as we spend it”.

We believe that the main aim of the education is to make a complete individual who is always ready to serve his or her country. We not only let the students be literate, but also educate them. A country can become successful, strong and safe from each and every direction only after the children are developed wholistically, because at the end they are the building blocks of the future nation.

University Model School came into existence in the eventful year of 1998 where a public charitable and educational trust was formed by a pioneer of development, “Mr. Manzoor Ahmed”. The motive behind formation of this esteemed institution was to realize the potential within the poor students who could not make it to higher levels of study due to insufficient funds for education. The institution from the date of its formation has contributed much to the society and will continue to do so forever.

OBJECTIVE OF QUALITY MANAGEMENT

The need for development was always felt by the nation. The need for united efforts were realized where all the societies of the nation in form of the Government sector, private sector, the rich and the poor all were required to join hands for a common cause and the common cause was to uplift the level of education in the nation for a better tomorrow. Efforts for under privileged children and handicapped students are also made which believes that each person has a hidden potential within himself.
